

# DOCTORS HAVE A DUTY TO MAKE PATIENTS THEIR FIRST CONCERN.

Getting the care you need relies on you having access to specialist trained doctors when you need them. Sadly patient care continues to be compromised by the State Government's position on workloads and staffing issues. Amidst a backdrop of constant change, driven by politics rather than patient care, the Government now wants to cut pay and are refusing the security of a new work agreement.

In the end, it's the patients who suffer.

**Support your doctors to provide  
the best care they can in our community**
